APRL IS FUELED BY COMMUNITY

Aggie Propulsion & Rocketry Lab (APRL) is a student-run collegiate rocketry team at UC Davis aiming to construct and launch the college's first-ever bi-propellant liquid-fueled rocket, introducing liquid rocketry to the university for the first time in the institutes history.

APRL aspires to make rocketry accessible to students of all backgrounds, regardless of any prior knowledge or experiences. Various subteams branching from vehicle design and propulsion systems teach and foster a community of like-minded individuals who all share a common passion for space and rocketry.

Your trust and support are crucial to continue to push the boundaries of collegiate rocketry and propulsion!
